

# Water Shutoff Notice

Dear Citizens:

On the week beginning September 14<sup>th</sup>, all water meters in town are scheduled to be replaced. This will cause water service to be shut-off to individual homes while the meter is being replaced. The intent is that this can/will be completed in as short of time as possible to minimize disruption.

The company that will be replacing meters is called "Meterworks" and they will be going to each home during that week to replace meters. In order to facilitate the process, a marker may be placed to indicate a meter's location in order for them to complete their work and spend as little time at your home as possible. If a marker is placed at your meter, please do not remove the marker until you are sure your meter has been replaced.

Should you have any questions regarding this project, please contact council member Mylind Fawcett at 435-659-4233 or Mayor Craig Hildalgo at 435-770-1229.
