

NOTICE: Green Waste Bin Location Changed

For quite some time we have been looking for a better place for the green waste bin. We have decided to move the bin to 300 South and Main where the old fuel tanks used to be. The reason for this move is to address concerns Logan has concerning post office traffic, overhead power lines, and a power pole in close proximity. Citizens have also raised concerns with traffic, difficulty getting into and out of the area, and being extremely muddy during inclement weather or change in seasons. The power pole at the current location has been hit several times and is starting to lean to the south.

The new location will allow easier access and no overhead obstructions and will be a temporary area until the collection issues with Logan are resolved. We express our appreciation to the citizens who have helped keep the current area clean of debris around the dumpster and I would hope that in the future everyone would take a rake with them when emptying green waste and help. This new area will also provide the town with the ability to install surveillance cameras should the need arise. We expect this move to take place around May 5th. Please feel free to contact me with any questions or suggestions you may have.

Thank You,

N. Craig Hidalgo
